Portfolio of Work: Microsoft Identity & Access Administrator

Note: Contents have been deleted. This is not a full version of the document

Date: Sept 2025

Prepared by
Jean-Philippe LO SIOU

Author
Jean-Philippe LO SIOU
Version: 1.0

The Purpose of this Portfolio of Work Document showed both theory and practical knowledge gained.

Contents

Portfolio of Work: Microsoft Identity & Access Administrator	1
Manage user roles	3
Add a new user	3
Login and try to create an app	3
Assign the application admin role and create an app	4
Assign a role to a user	5
Check application permissions	5
Remove a role assignment	7
Remove the application administrator from Chris Green	7
Bulk import of users	7
Bulk operations for creating users with a .csv file	7
Bulk addition of users using PowerShell	8
Remove a user from Microsoft Entra ID	10
Remove a User	10
Restore a deleted user	10
Add a Windows 10 license to a user account	11
Find your unlicensed user in Azure Active Directory	11
Working with tenant properties	13
Create custom subdomains	13
Create a custom subdomain name	13
Changing the tenant display name	14
Set the tenant name and technical contact	14
Review the Country or region and other values associated with your tenant	14
Finding the tenant ID	15
Setting your privacy information	15
Adding your privacy info on Microsoft Entra ID, including Global privacy contact and Privacy statement URL	15
Check your Privacy Statement	15
Assigning licenses using group membership	16
Create a security group and add a user	16
Check to see if Delia Dennis has access to Office 365	16
Create a security group in Microsoft Entra ID	16
Assign a license to a group	17
Confirm the Office 365 license	17
Create a Microsoft 365 group in Microsoft Entra ID	17
Create the group	17
Creating a dynamic group with all users as members	18
Create the dynamic group	18
Verify the members have been added	19
Experiment with alternate rules	19
Configure external collaboration settings	22
Allowing guest users to be invited into your organization	22
Enable Guest Users to perform self-service sign-up	22
Configure external collaboration settings	22
Add guest users to the directory	23
Add the guest user	23
Invite guest users in bulk	24
Bulk user invite	24
Invite guest users with PowerShell	25
Add a federated identity provider	26
Configure identity providers	26
Configure Google to be used as an identity provider	26
Add a test user	29
Configure Azure to work with an External identity provider	29
Configure Microsoft Entra ID for Google federation	29
Invite you Test User account	30
Accept the invitation and login	31
Login to Microsoft 365 using your Google account	32
Implement an identity management solution	33
Enable multi-factor authentication	33
Review and enable Multi-factor Authentication in Azure	33

Configure MFA to be required for login	33
Configure and Deploy self-service Password reset	33
Manage Microsoft Entra smart lockout values	33
Implement and test a conditional access policy	34
Enable sign in and user risk policies	34

Manage user roles

Create a new user and test their application admin rights

- Add a new user
- Login and try to create an app

Add a new user

The screenshot shows the Microsoft Entra admin center interface. The breadcrumb navigation is 'Home > TechtoriumJPO365 > Users > aaron'. The 'Users' section is active, and the 'All users' tab is selected. A 'New user' button is highlighted with a green box. Below it, a search for 'chris' has been performed, resulting in one user found: 'Chris Green' (User principal name: chris@TechtoriumJPO365..., User type: Member, On-prem: No). A notification on the right states 'Successfully created user' for 'Chris Green'.

Login and try to create an app

The screenshot shows a Microsoft sign-in page. The email address 'chrisg@techtoriumjpo365.onmicrosoft.com' is entered in the email field. Below the email field, there is a section titled 'Update your password' with a message: 'You need to update your password because this is the first time you are signing in, or because your password has expired.' There are three password input fields, each with a strength indicator. A 'Sign in' button is at the bottom right.

The screenshot shows the Microsoft Entra admin center interface. The breadcrumb navigation is 'App launchers | Collections > Enterprise applications | All applications'. The 'Browse Microsoft Entra Gallery' page is active. A 'Create your own application' button is highlighted with a green box. Below it, there is a search bar and filters for 'Single Sign-on : All', 'User Account Management : All', and 'Categories : All'. The 'Cloud platforms' section is visible, showing 'Amazon Web Services (AWS)' and 'Google Cloud Platform'.

Configure

Configure identity provider

Users who don't already have a Microsoft Entra or Microsoft account can sign in without having to create an account. Each time the user signs in to your directory, they receive a passcode via email for authentication. You can also enable self-service sign-up with email one-time passcode for specific apps in your user flows. →

Create OAuth client ID

A client ID is used to identify a single app to Google's OAuth servers. If your app runs on multiple platforms, each will need its own client ID. See [Setting up OAuth 2.0](#) for more information. [Learn more](#) about OAuth client types.

Application type * Web application

Name * Microsoft Entra B2B

The name of your OAuth 2.0 client. This name is only used to identify the client in the console and will not be shown to end users.

The domains of the URIs you add below will be automatically added to your [OAuth consent screen](#) as [authorized domains](#).

Authorized JavaScript origins

For use with requests from a browser

+ ADD URI

Authorized redirect URIs

For use with requests from a web server

URIs 1 * https://login.microsoftonline.com

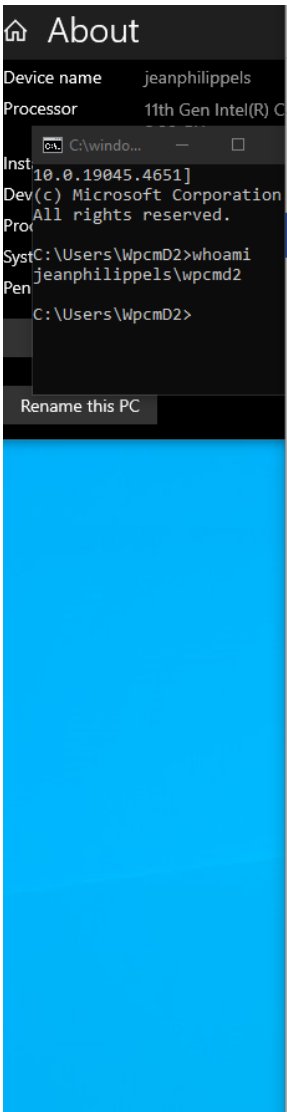

URIs 2 * https://login.microsoftonline.com/te/02a8b01d-83ef-47b6-88eb-049d369396

URIs 3 * https://login.microsoftonline.com/te/TechtoriumJP0365.onmicrosoft.com/o

+ ADD URI

Note: It may take 5 minutes to a few hours for settings to take effect

Add a test user

The screenshot shows the Microsoft Entra ID console. On the left, a terminal window displays the command prompt output for the user 'jeanphilippels'. The main pane shows the 'APIs & Services' section with 'OAuth consent screen' selected. The 'Microsoft Entra ID' app is highlighted. The 'Publishing status' is set to 'Testing'. The 'User type' is 'External'. The 'OAuth user cap' is 100, with 1 user (1 test, 0 other) currently. The 'Test users' section shows a '+ ADD USERS' button. Below it, a table lists the test user 'jeanphilippels@gmail.com'.

Filter	Enter property name or value
